

Scott's car has gotten its third flat tire for the third time in 2 months. He can't seem to remember to fill up his tires. He is tired of always getting flat tires during these cold winter months.

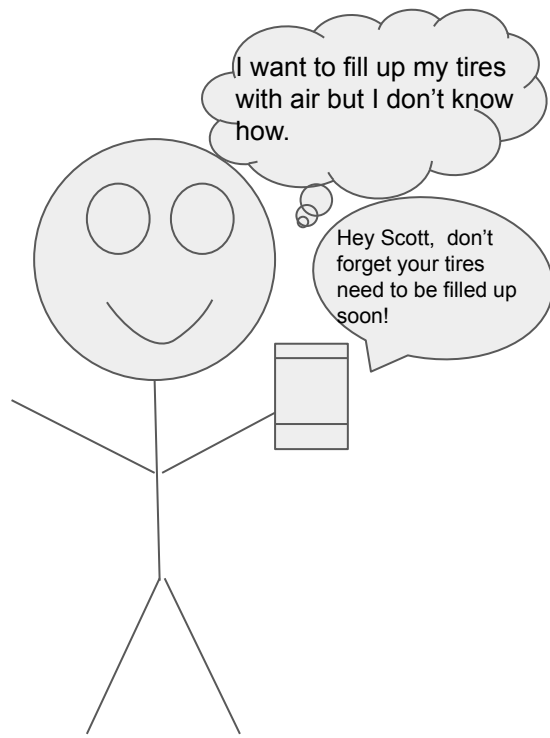

Scott tells his friend Bob about his problem. Bob says he was having similar problems until he downloaded an app that helps him with reminders to maintain his appliances and car.

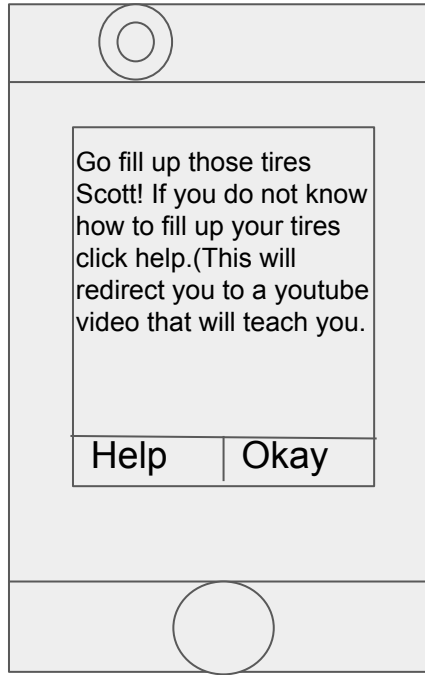

Scott downloads the app Maintenance Tracker and he is very excited to finally be able to keep track of how filled up his tires are.

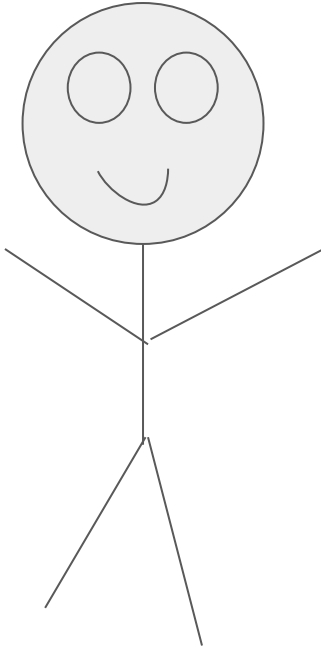

Scott downloads the app and makes it so the app will remind him to fill up his tires. While also getting a tip about why his tires could be losing air so quick.

Scott gets his reminder to fill up his tires. He is happy that he knows to fill up his tires but he does not know how to fill them.

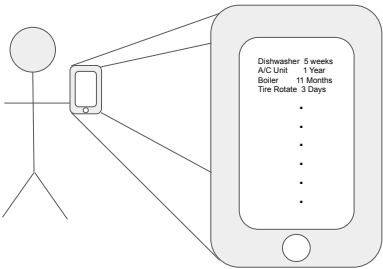

Due to Scott not knowing how to put air into his tires he clicks the help link and it redirects him to a youtube video that teaches him exactly how to do it.

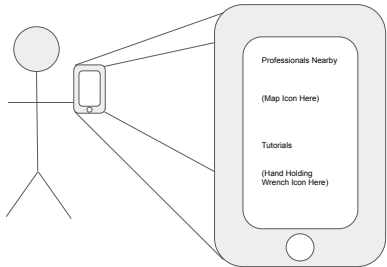

Scott went and filled up his tires! Not only did he fill up his tires successfully, he also learned a valuable lesson by learning how to blow up his tires.

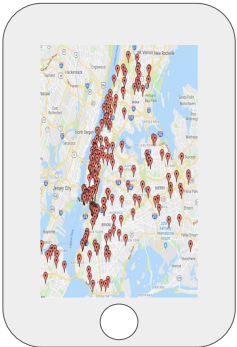

Brian rents an apartment and his landlord doesn't pay for maintenance. Since Brian plans to own his own place someday he wants to know when and how to fix things around the house in case they break.

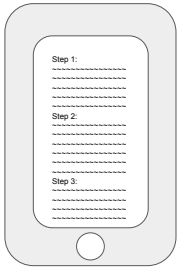

Brian gets the maintenance tracker app and inputs when the last time things were maintained

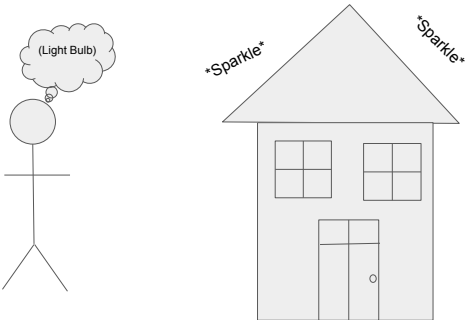

The app then reminds Brian when things need to be maintained and either shows a list of professionals to help, or shows you how to fix it yourself

If the map icon is selected then the app will show were the relevant professionals are

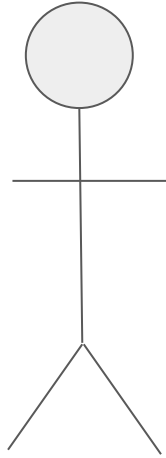

If the Wrench icon is selected then the app will show a tutorial on how to fix/maintain the item in question

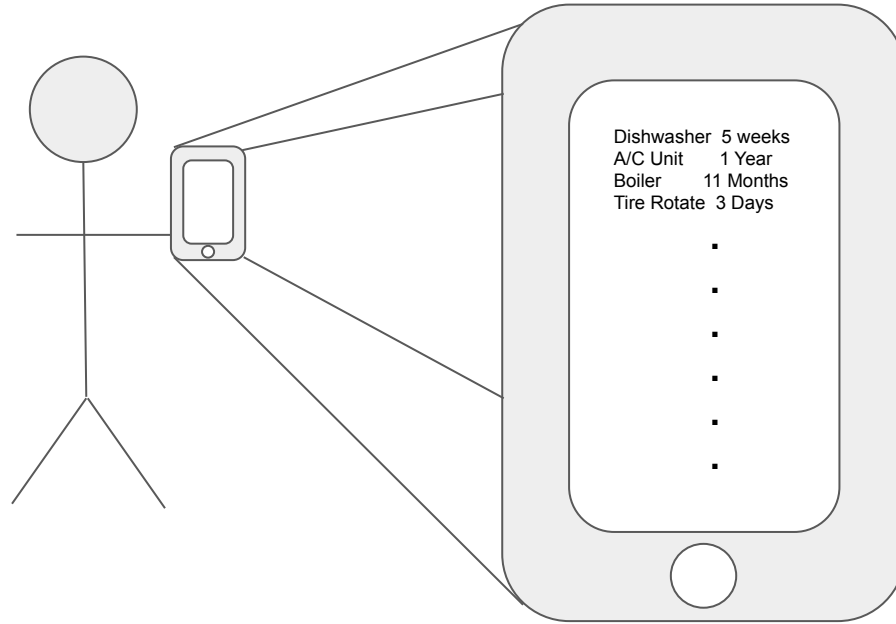

Brian now knows when to upkeep his appliances and the knowledge on how to do it, or at least the number of someone who does

Jeffrey is a huge cold food connoisseur and strictly eats food from the refrigerator or freezer. This causes his refrigerator and freezer to be consistently packed. In response to a full refrigerator and freezer the condenser coils beneath must be cleaned two to three times a year; however Jeffrey doesn't even know they exist.

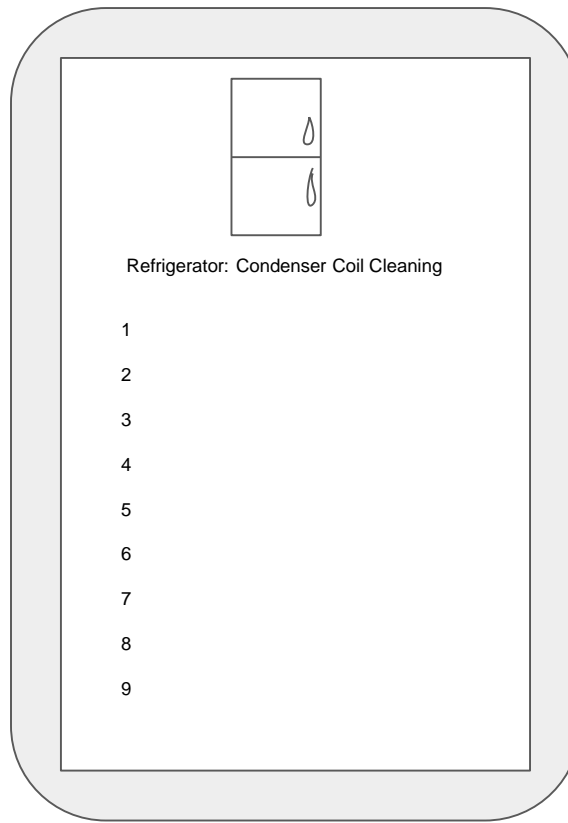

Thankfully, Jeffrey owns the app called Maintenance Tracker and Teacher and has input his refrigerator as an appliance.

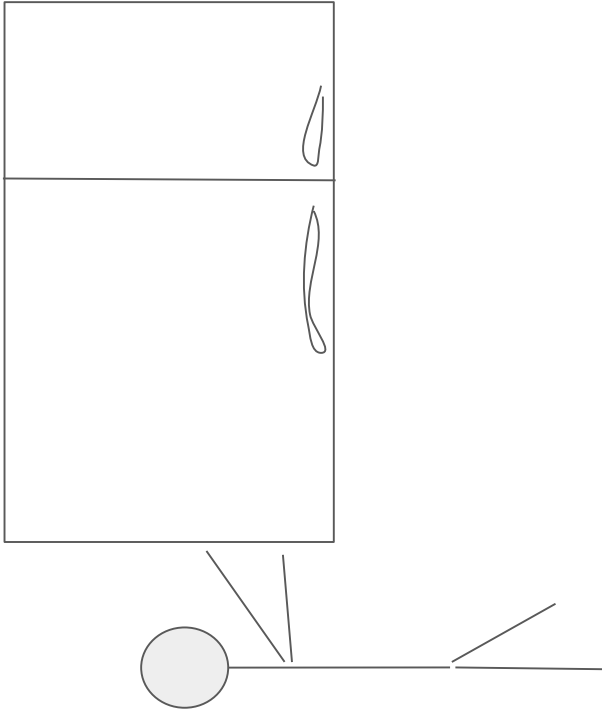

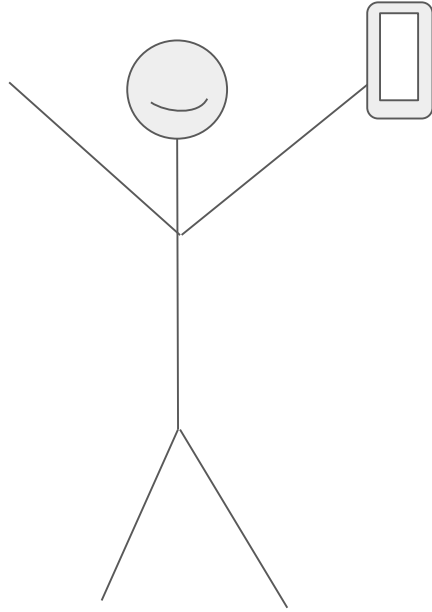

Jeffrey gets a notification from the app and sees that his refrigerator is due for a coil cleaning. This notification also has a quick diagram to the designated repair area.

Jeffrey clicks on the notification and is sent to the app. From here, he is given a detailed step by step process on how to clean the fans himself if need be.

Jeffrey now can clean the condenser coils for his fridge without having to pay for or schedule an appointment with a service provider.

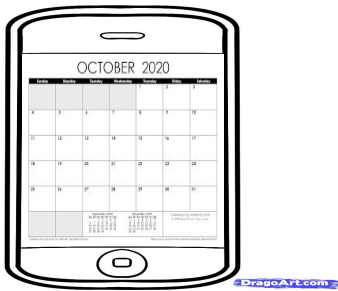

Jeffrey now has piece of mind knowing he will be notified for any and all maintenance needs in his home.

Nick is very busy at his accounting firm and with his family so he always forgets to do routine maintenance on his household appliances and his car. He wants to change this so he can keep his car and appliances up to par.

Nicks wife is stay at home and wants to help her husband so she downloads this awesome app called Maintenance Tracker.

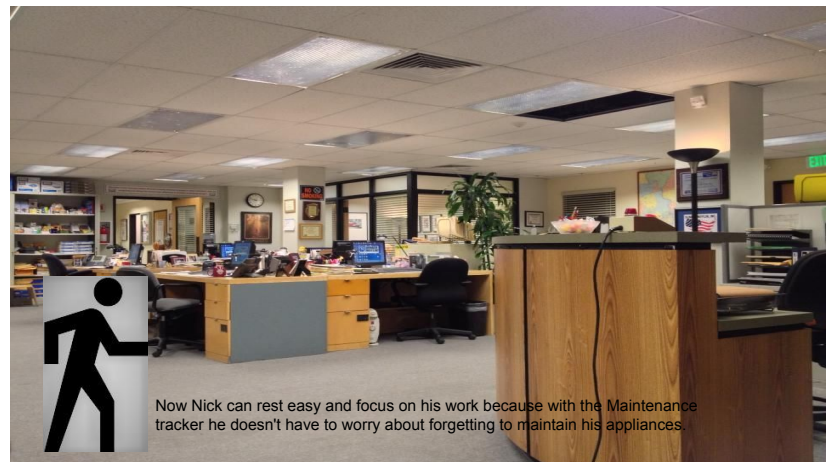

The app was as easy to use as a calendar, she input all of the appliances that needed routine maintenance inside and outside of the house so it would remind them when and what needed maintenance as time went on.

Sometimes Nick didn't have time to do the maintenance on his own but his wife could still help because she can learn straight from the app that showed how to fix/maintain the appliances. Even if she didn't want to do it herself she could also call professionals that the app would lead her to.

Nick leaves for work but totally forgets that he needs to do work for his fridge! Oh no! It will surely explode now, but no worries because with the app his wife is reminded and she is able to fix it on her own.

Now Nick can rest easy and focus on his work because with the Maintenance tracker he doesn't have to worry about forgetting to maintain his appliances.
